Table of Contents

Foreword by Kern Sibbald	19
Foreword by the Author	23
1 Introduction	27
1.1 Bacula's architecture.....	28
1.1.1 The file daemon.....	28
1.1.2 The storage daemon.....	29
1.1.3 The director daemon.....	29
1.1.4 The catalog.....	29
1.1.5 The Bacula console.....	30
1.2 Interplay between components.....	30
1.3 Properties of Bacula.....	33
1.4 Bacula development.....	34

1.5	About this book.	35
1.5.1	Chapter overview.	36
1.5.2	Contents of the DVD.	38
1.5.3	Language and terminology.	39
2	Installation	41
2.1	Importing the appliance from the DVD.	44
2.1.1	Installing the virtualization software.	46
2.1.2	Importing and starting the virtual machine.	49
2.2	Selecting and installing a database.	55
2.2.1	Package-based installation of database systems.	56
2.3	Package-based installation of Bacula.	57
2.3.1	Updates and version compatibility.	58
2.3.2	Packages from the dassIT Bacula repository.	59
2.3.3	Packages from the website of the Bacula project.	62
2.3.4	Packages for the distribution in use.	63
2.4	Compiling and installing Bacula from the source code.	63
2.4.1	Building the source RPM on your own distribution.	64
2.4.2	Privileges for Bacula daemons.	67
2.4.3	Compiling the source code manually.	68
2.5	Setting up the database.	72
2.5.1	General information on setting up databases.	73

2.6	Installing graphic programs for Bacula.	76
2.6.1	Bat.	76
2.6.2	Web-based interfaces.	77
3	First steps	79
3.1	The Bacula appliance.	80
3.2	Is Bacula working?.	80
3.2.1	Testing the services.	80
3.2.2	Testing with Bacula tools.	84
3.3	First steps.	92
3.3.1	The first backup.	92
3.3.2	The first restore.	96
3.4	Configuration for productive backups to hard drives.	102
3.4.1	Changing the storage location for Bacula volumes.	103
3.4.2	Changing the files to be backed up.	104
3.4.3	Integrating the appliance into the network.	113
3.4.4	Configuring the network.	114
3.4.5	Adjusting addresses in Bacula.	114
4	Backup techniques and concepts	117
4.1	Backup types.	118
4.1.1	Full backup.	118

4.1.2	Differential backup.	120
4.1.3	Incremental backup.	121
4.2	Backup intervals and retention time.	122
5	Configuring Bacula	127
5.1	Bacula's own backup.	127
5.2	General information on Bacula configuration files.	129
5.3	Bacula resources.	133
5.3.1	director daemon configuration – bacula-dir.conf.	133
5.3.2	Storage daemon configuration – bacula-sd.conf.	148
5.3.3	File daemon configuration – bacula-fd.conf.	149
5.3.4	File daemon/client configuration – bacula-fd.conf.	151
5.3.5	Bacula console configuration – bconsole.conf.	152
5.4	Adding a new client.	153
5.4.1	Installing the client software.	154
5.4.2	Installing the file daemon.	154
5.4.3	Configuring the file daemon.	155
5.4.4	File daemon in the director configuration.	158
5.4.5	Checking the connection between director and file daemon.	159
5.4.6	Interaction between passwords and names.	160
5.4.7	Configuring a FileSet for a new client.	161

5.4.8	Configuring a job for a new client.	163
5.4.9	Checking the client connection.	164
5.5	Implementing a multiple pool backup strategy.	165
5.5.1	Backup type and interval.	166
5.5.2	Storage time.	167
5.5.3	Simulation of our backup concept.	170
5.6	Catalog database maintenance and media management.	172
5.6.1	Storage times and automatic media management.	172
5.6.2	How does Bacula identify the next medium to write to?	179
5.6.3	Life cycle of a Bacula volume.	181
6	Backup hardware	183
6.1	Backing up to hard drives.	184
6.2	Integrating a tape library in Bacula.	186
6.2.1	Tape drives and medium changers – the basics.	186
6.2.2	Tape drives and medium changers in practice.	190
6.2.3	Tape drives and media changers with Bacula.	198
6.2.4	Testing with btape.	200
6.2.5	Data spooling.	210
6.2.6	Using an autochanger with Bacula.	212
6.3	Using a single tape drive with Bacula.	215

6.4	Backup concept for single drives.	217
7	Operating Bacula	223
7.1	Commands with arguments.	224
7.1.1	Submitting arguments interactively.	225
7.1.2	Automatically filling arguments.	226
7.1.3	Entering arguments directly.	226
7.1.4	Tab completion.	226
7.1.5	Automatic completion of incomplete input.	227
7.2	Bacula console commands.	228
7.2.1	Status information.	229
7.2.2	Job management.	242
7.2.3	Media management.	257
7.2.4	Configuration.	262
7.2.5	Other.	266
8	Advanced applications	271
8.1	FileSet in detail.	271
8.1.1	Specifying files and directories.	272
8.1.2	Determining the files to be backed up: Include and Exclude.	273
8.1.3	FileSet options.	274
8.1.4	Dynamic generation.	286

8.1.5	Detecting modified FileSets.	290
8.1.6	How does Bacula process the Include/Exclude directives.	290
8.1.7	Windows.	292
8.1.8	Backing up all local file systems.	293
8.1.9	Examples.	299
8.2	Run directive in detail.	302
8.2.1	Time data.	302
8.2.2	Job Overrides.	305
8.3	Commands before, during and after backup.	308
8.3.1	RunScript resource.	309
8.3.2	RunScripts under Windows.	313
8.4	The Messages resource in detail.	316
8.4.1	Directives for sending messages by email.	317
8.4.2	Definition of message targets.	318
8.4.3	An overview of message targets.	321
9	Advanced configuration	325
9.1	Scaling Bacula.	325
9.1.1	Executing multiple jobs simultaneously.	325
9.1.2	Writing multiple jobs onto one medium.	329
9.1.3	Multiple tape drives in an autochanger.	331

9.2	backup-2-disk-2-tape/migration/copy jobs.	339
9.2.1	Why perform migrations?.	340
9.2.2	Restrictions on migration and copy jobs.	341
9.2.3	Configuring migration and copy jobs.	341
9.2.4	Migrations in practice.	344
9.2.5	Copy jobs.	349
9.2.6	Copy jobs in practice.	349
9.3	Advanced job management.	354
9.3.1	Handling duplicate jobs.	354
9.3.2	Restricting the runtime of jobs.	356
9.4	Backup strategy for laptops.	357
9.5	Accurate backup.	360
9.5.1	Why accurate backup?.	360
9.5.2	Example of problems without accurate backup.	362
9.5.3	How does accurate backup work?.	365
9.5.4	Configuration of accurate backup.	365
9.6	Encrypting data.	368
9.6.1	Creating the necessary keys.	370
9.6.2	Configuration in the file daemon.	371
9.6.3	Restoring with the master key.	373

9.6.4	TLS – authentication, transport and communication encryption.	374
9.7	Permissions for user interfaces with ACLs.	387
9.8	Virtual full backup.	395
9.8.1	Virtual full backup in practice.	397
9.9	De-duplication – base jobs.	407
9.9.1	Basic considerations on base jobs.	407
9.9.2	Practical example of a backup with base jobs.	409
9.9.3	Scheduling base jobs.	412
9.9.4	How base jobs work.	413
9.9.5	Fine-tuning base jobs.	414
9.10	Verify jobs.	415
9.10.1	Intrusion detection with Bacula.	415
9.11	Backups through firewalls.	420
9.11.1	Ports.	420
9.11.2	NAT.	421
9.11.3	Timeouts.	422
9.12	Read-only file daemon.	423
9.13	Command line tools.	423
9.13.1	bwild.	424
9.13.2	bregex.	425

9.13.3	bcopy.....	426
9.13.4	bsmtp.....	426
10	Internal processes	427
10.1	Network communication.....	427
10.1.1	Port numbers.....	427
10.1.2	The communication process.....	428
10.1.3	Allocation of target addresses.....	430
10.1.4	Which communications take place, and when?.....	432
10.2	Database schema.....	438
11	Extended applications	445
11.1	User interfaces.....	445
11.1.1	Bacula Tray Monitor.....	445
11.1.2	Bat.....	447
11.1.3	mhvtl.....	448
11.2	Using scripts to automate the Bacula console.....	450
11.3	Backups of virtual machines.....	452
11.3.1	VMware.....	453
11.3.2	VMware Consolidated Backup.....	454
11.3.3	Citrix XenServer.....	467
11.4	Backup of the Novell NSS file system.....	477

11.5	Plugins.....	479
11.5.1	Configuration and activation.....	479
11.5.2	bpipe.....	481
11.5.3	Citrix XenServer and bpipe.....	483
12	Emergency restore	487
12.1	Precautionary measures that protect the Bacula system.....	488
12.2	Ways to approach a restore.....	488
12.3	Tools.....	489
12.3.1	bextract.....	489
12.3.2	bls.....	490
12.3.3	bscan.....	490
12.3.4	dbcheck.....	490
12.4	Performing an emergency restore.....	491
13	Troubleshooting	495
13.1	No privilege.....	495
13.2	Cannot label Volume because it is already labeled.....	496
13.3	No route to host.....	497
13.4	Unable to authenticate with xxx daemon.....	497
13.5	is waiting for Client xxx-fd to connect to Storage yyy.....	498
13.6	gethostbyname() for host xxx failed.....	501

I Appendix	503
A Client installation	505
A.1 Microsoft Windows.....	505
A.1.1 Operational test.....	511
A.1.2 Windows firewall.....	512
A.2 Mac OS X.....	516
A.3 Solaris.....	519
B Variable replacement in Bacula	521
B.1 Variable replacement for media labels.....	521
B.2 Variable replacement in RunScripts.....	523
B.3 Variable replacement in the autochanger command.....	524
B.4 Mount command.....	524
B.5 Variable replacement in the mail and operator commands.....	525
C Directives and their data types	527
C.1 Director configuration (bacula-dir.conf).....	528
C.1.1 Catalog resource.....	528
C.1.2 Client resource.....	529
C.1.3 Console resource.....	530
C.1.4 Counter resource.....	532
C.1.5 Director resource.....	532

C.1.6	FileSet resource.	535
C.1.7	FileSet include/exclude resource.	535
C.1.8	FileSet options resource.	536
C.1.9	Job resource / JobDefs resource.	538
C.1.10	Pool resource.	543
C.1.11	RunScript resource.	545
C.1.12	Schedule resource.	546
C.1.13	Storage resource.	546
C.1.14	Messages resource.	548
C.2	Console configuration (bconsole.conf).	548
C.2.1	Console resource.	548
C.2.2	Director resource.	549
C.3	File daemon configuration (bacula-fd.conf).	551
C.3.1	Client/file daemon resource.	551
C.3.2	Director resource.	553
C.3.3	Messages resource.	554
C.4	Storage daemon configuration (bacula-sd.conf).	555
C.4.1	AutoChanger resource.	555
C.4.2	Device resource.	555
C.4.3	Director resource.	559
C.4.4	Storage resource.	561

C.4.5	Messages resource.	562
C.5	Shared configuration resources.	563
C.5.1	Messages resource.	563
C.6	Bacula types.	564
C.6.1	FileSet options.	572
C.6.2	Commands in the Bacula console.	573
C.7	Modifiers for data types.	574
